### Key Insights

Germany churns at 32.4% — nearly 2x Spain and France (~16%), a statistically significant gap ( $\chi^2 = 301.26$ ,  $p < 0.001$ ). Customers holding 3+ products churn at 83–100%, despite deeper relationships — the single strongest churn predictor in the dataset ( $\chi^2 = 1503.63$ ). Recommend prioritizing retention outreach toward inactive German customers and investigating the 3+ product segment.
